GitHub: github.com/sepezho
LinkedIn: linkedin.com/in/sepezho

Skills front-end:
* JS libs for ETH / SOL / TON / COSMOS;
* Web3Js;
* React;
* Tests (jest);
* Js/Ts;
* Redux (+saga);
* Webpack / Yarn / NPM;
* Router;
* Effector;
* Styled Components;
* Also: graphql; gatsbyjs; jquery; scss; less; sass; css modules; nexjs; dayjs and etc

Skills back-end:
* NodeJs;
* MongoDb;
* Tests (jest);
* Python;
* SQL;
* SQLite;
* Linux;
* Git;
* REST API;
* CI/CD;
* WebSockets;
* TeleBot;
* SSL;
* etc

Skills smart contracts:
* FunC (TON);
* Solidity (EVM);
* Rust (NEAR);

Work experience:

* Contest creator at TON Foundation

- 2023 | TON - it is top 20 blockchain that was created by
  telegram

- I'm working on creating challenges for the contests. I also
  solve my own tasks and write tests on which will be tested

the applications of participants of the contest. In general,
I'm creating a platform for holding contests.

* Co-Founder and CTO of EVAA
- 2023 | Lending protocol on TON
- Writing smart contracts on FunC. Working on architecture of
ecosystem. We raised 200k on 7M valuation!

* Co-Founder and CTO of RAVEN
- 2023 | Decentralized oracles on TON
- Working on Front-end and Back-end. Creating custom library
for npm. Writing smart contracts on FunC. Plus architecture of
ecosystem.

* Co-Founder and CTO o Tonana
- 2022 | cosschain bridge and swap / layer-zero protocol
- Created Front-end and Back-end for app.tonana.org. Designing
entire architecture of tonana v2 (layer-zero like protocol).

* Founder and CEO of Toncells
- 2022 | NFT collection
- Created app.toncells.org backend side on NodeJs + partly
worked front-end. Created team for this project. Worked on
marketing - raised TG channel up to 5K subscribers. Set up
delegation of tasks daily calls and sprints with tasks.

* Web3 Front-end dev
- 2022 | BlockCzech / Praha
- TypeScript; React; EtherJs; WalletConnect; Web3Js; AntD; etc
- NFT sell platforms & lendings for it.

* Web3 Front-end dev
- 2021 | Citadel.one / Moscow
- TypeScript; React; Redux; Webpack; Styled components; Git;
CosmosJs and etc
- Worked on cosmos governance web app, that supports several
networks.

* Front-end dev
- 2021 | HeksRay / Moscow
- TypeScript; React; Effector; Webpack; Styled components;
Git; dayjs and others
- Develop huge project (itrainyou.ru) with an intelligent
team.

* Back-end dev
- 2021 | Krasnodar
- Python; Telebot; a few other technologies
- Created telegram bot with python (@PARADIGM_Demosbot) for
musical label Paradigm.

* Web3 Front-end dev
- 2021 | Freelance & remote
- TypeScript; React; Redux; Web3; Redux-saga; Webpack; Styled
components; Git; dayjs and others

- Worked on yield aggregator (pumpy.farm). Worked with smart-contracts and Web3.

* Other FE/BE projects
- 2021 | Freelance & remote
- Worked on 5 commercial projects such as: admin panels, telegram bots, front-end applications and other stuff.

* Old pet projects:
- sepezho.com
- portfolio.sepezho.com
- seppass.sepezho.com
- more on: github.com/sepezho/
